Software Engineer — Full-Stack & Mobile Developer

Software Engineer specialized in mobile and full-stack development with Flutter, React, NestJS, and .NET, experienced in AI, RAG, AI agents, and Azure AI Foundry. Skilled in testing, CI/CD, and cloud deployment, with experience delivering production-ready platforms for companies and exploring entrepreneurship through the development of my startup idea, StepWise.

Education

Arab University of Science, Preparatory Cycle in Mathematics and Physics Sep 2021 – May 2023

Software Engineering Degree – Excellent Honors Sep 2023 – May 2026
ESPRIT – Private Higher School of Engineering

Professional Experience

Software Engineering Intern (PFE) – WICMIC Group January 2026 – July 2026

MyMicLab – AI-Powered B2B Textile Platform

- Built a production-ready B2B platform connecting a textile manufacturer's commercial teams with 50+ international partner brands for client management, product discovery, and digital sales.
- Implemented an AI assistant using RAG and a personalized recommendation system that tailors product suggestions to each user.
- Developed real-time messaging and an interactive news feed with reactions and comments using WebSocket.
- Built a React admin dashboard for user, product, and role management with business activity monitoring and analytics.
- Deployed a full CI/CD pipeline with GitHub Actions, Docker, and Azure, ensured code quality with SonarQube, and validated performance through K6 testing
- **Technologies:** Flutter, React, .NET, Python, SQL Server, WebSocket, RAG, Docker, Azure, GitHub Actions

Summer Internship – Refresh Branding Company July 2025 – August 2025

Workway – B2B Employee Carpooling Platform

- Developed a production-ready B2B mobile platform that connects companies and employees for daily carpooling, with flexible trip planning and ride matching.
- Implemented real-time ride tracking using Map APIs, allowing employees to follow vehicle locations during trips and visualize routes in real time.
- Deployed the platform across 10 companies, supporting real-world employee commuting at scale.
- **Technologies:** Flutter, Firebase, Map APIs

Additional Projects

StepWise – AI-Powered Inclusive Learning Platform

- Developed an AI-powered web, mobile platform that supports children with Down syndrome through personalized educational activities and parental progress tracking.
- Built a real-time multimodal AI assistant with Azure AI Foundry and GPT-4o Realtime that analyzes video frames to validate children's tasks and enables natural voice interaction through Azure Speech.
- Integrated AI learning features with Azure Pronunciation Assessment that evaluates speech and GPT-Image-1 that generates educational images
- Tested the platform with **75+ parents and 45+ children, leading to 20+ product improvements and**

positive validation from psychometricians; also extended the platform with **CareWise** for automated job recommendations using web scraping and n8n.

- Technologies: **Next.js**, **Flutter**, **Azure AI Foundry**, **GPT-4o Realtime**, **Cosmos DB**, **Azure Speech**, **GPT-Image-1**, **n8n**, **Azure Web App Service**

ChicCircle – AI-Powered Fashion Assistant & Marketplace

github.com/ChicCircle

- Developed an AI-powered fashion platform with personalized outfit recommendations based on preferences, weather, and context.
- Built a real-time Gemini AI fashion assistant for outfit analysis, suitability ratings, and styling advice using WebRTC and LiveKit.
- Integrated a peer-to-peer marketplace for listing, discovering, and purchasing second-hand clothing.
- Technologies: **NestJS**, **Kotlin (Jetpack Compose)**, **SwiftUI**, **Swift Native**, **MongoDB**, **Gemini AI**, **WebRTC**, **LiveKit**

Elva – Mobile Language Learning ChatBot

github.com/Elva

- Mobile application that allows users to practice languages through an **audio-video chatbot** and interactive messaging, with thematic sessions and oral tasks validated through video analysis.
- Technologies: **Flutter**, **NestJS**, **LiveKit**, **Google Translate API**

Automation Projects with n8n

AI Multi-Agent: Built an n8n agent coordinating 4 sub-agents for web search, email, calendar, and Airtable through Telegram voice commands.

Content & Email Automation: Built workflows for web-content publishing to X with user approval and automatic email classification and routing.

RAG Chatbot: Built a chatbot that retrieves relevant data before generating answers.

Competitions & Hackathons

Microsoft Imagine Cup – Semi-Finalist

Jan 2026 – Jun 2026

- Reached the **Semi-Finals** with StepWise, representing the **Arab world as the only Arab team** to reach this stage.

Empower X-Hack – Jury Favorite

June 2025

- Developed a blockchain-based solution to **certify and match people with Down syndrome to employment opportunities**.

Mutual Hack – 4th Place

May 2025

- Ranked **4th** and earned a **4-month incubation opportunity with Mazam** to further develop the project's business model.

Technical Skills

Frontend & Mobile: Flutter, Kotlin, Jetpack Compose, Next.js, React, SwiftUI

Backend: .NET, NestJS, Spring Boot, Python

Cloud, DevOps & CI/CD: Azure, Docker, GitHub Actions

Tools & Automation: GitHub, Jira, Notion, Figma, ClickUp, Trello, n8n

Languages

French: Fluent - B2 Level | **English:** Fluent - B2 Level | **Arabic:** Native Language
